

## Disclosure management and reporting support

- ✓ As financial reporting frameworks are constantly evolving, also disclosures are constantly changing. EFRA can assist in the drafting of new/improved disclosures, the accounting policies.
- ✓ Furthermore, EFRA is also your single point of contact regarding IFRS compliance of your financial statements (annual reports, periodic reports, prospectus in the context of public offering).
- ✓ As IFRS or accounting terminology can be very specific, EFRA is specialised in the translation of financial statements or accounting documentation in English, Dutch and French.
- ✓ In today's globalised world, increased regulatory pressures and a desire for more financial transparency, accounting policies, reporting instructions and accounting manuals become increasingly important in companies. Furthermore, EFRA offers support in the communication with regulators, investors, lenders, auditors and employees regarding financial reporting.
